

# ACT REPORT

IKUZWE MBAGATUZINDE  
16 September 2022

## Introduction

WeRateDogs is a Twitter account that rates people's dogs with a humorous comment about the dog. The account was started in 2015 by college student Matt Nelson, and has received international media attention both for its popularity and for the attention drawn to social media copyright law when it was suspended by Twitter for breaking these aforementioned laws. In this act I made some analysis and visualizations found below.

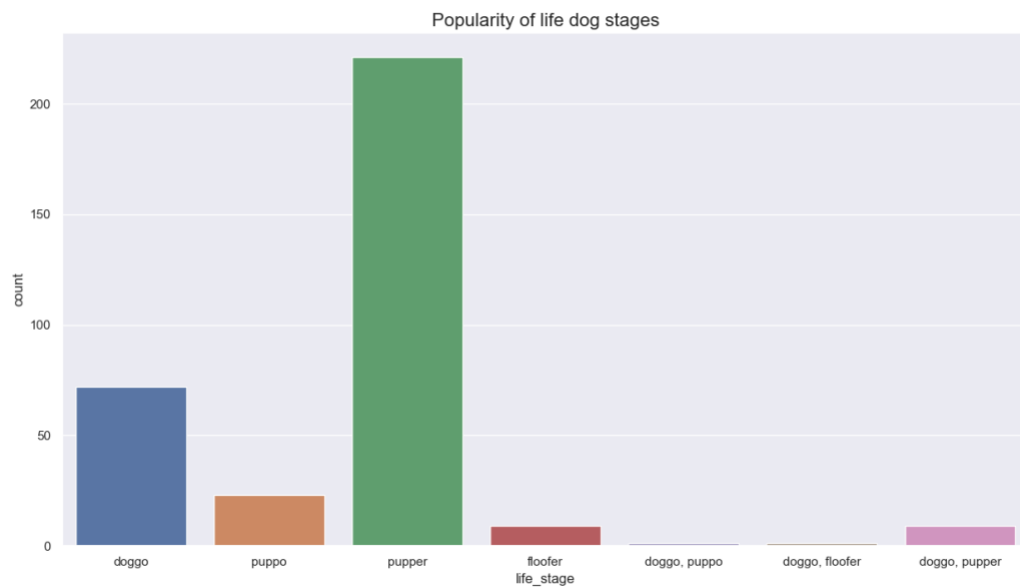

## INSIGHTS:

- There is positive correlation between favorites and retweets. It is expected.
- Pupper is the most popular dog Stage followed by doggo.
- Most users are those who used twitter for iPhone.
- The most popular dogs Which are Charlie, Lucy, Olivier, Penny, Tucker and Lola.

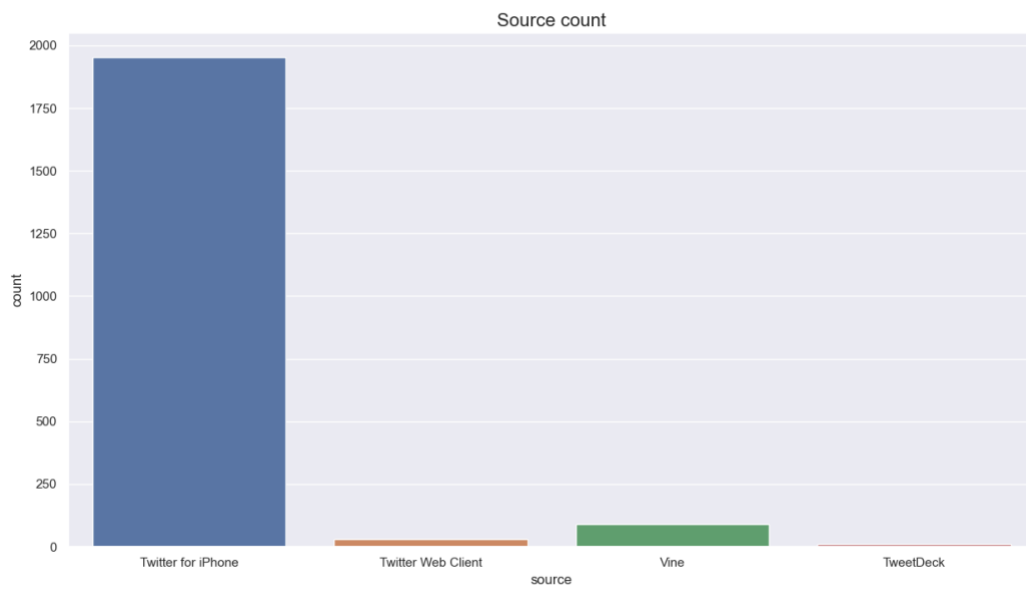

## VISUALIZATION:

This Scatter shows positive correlation between favorites and retweets is positive which is expected.

The most popular dog stage is Pupper and doggo as shown on the graph.

This shows that most users used Twitter for iPhone.

This graph shows that the rating is related to the popularity of the life stage of the dog. The most related life dog stage is Pupper.

This world cloud shows us the most popular dogs Which are Charlie, Lucy, Olivier, Penny, Tucker and Lola.

**Conclusion:**

This was a big project fun but not easy because It has a lot of dirty and messy data to work on but also a lot of insights. This project taught me a lot and made me improve the way use ressources. Data wrangling is the process of removing errors and combining complex data sets to make them more accessible and easier to analyze and thats why Its the stage that takes a lot of time.
